Make a Minibeast kit

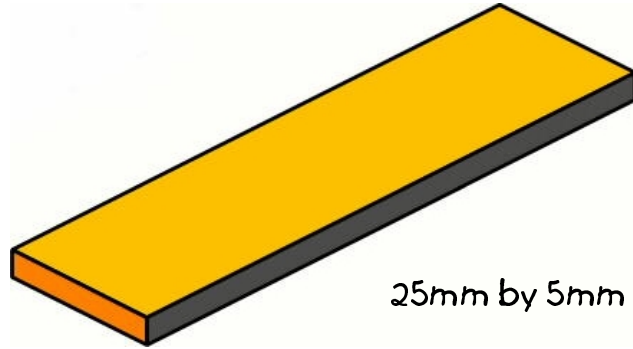

## Make a minibeast

To make your minibeast you can use....

10mm square wood

25mm by 5mm wood

These can be used to make the main frame or skeleton of your design.

You can also use any other materials which you think might be useful - things such as bottle tops, pipe cleaners, string, wool etc.

Also you are going to need some thin fabric such as cotton to join the wooden pieces.

## Stage 1 Designing your minibeast

Use the minibeast pieces kit to try out your ideas. Arrange the different pieces to make different minibeast designs.

If you find you like a design - stick the pieces onto the paper in that shape.

Here is an idea made with the kit.
